SHIPMENT OF MATTE

Glasgow & Western Resumes Regular Operations.

OUTPUT WILL BE HEAVY

CARLOAD TO BE SENT DOWN EVERY FEW DAYS.

The Old Exchange-The Afternoon Call-The New Exchange-The Magnolia Incorporates-Companies Formed On Bingham and Eureka Ground.

From D. McPherson Boyd, the efficlear merchany and cambier of the Glas-gow & Western Mining company of this city, it is learned that the first

this city, it is learned that the first carload of matte from its Golconda ametter at Golconda, Nev., to be marketed since the blowing in of the smelter upon the composition of its little branch railroad line, the Adecade & Golconda, has just been consigned to the Balt Lake smelters, the lot emorating about librity lone.

For several months past the Glasgow & Western has been engaged in the building of this little railroad, which is twelve union in beneth, and which connects the company's begrouper mine at Adelaide with its reduction works at Golconda. The work of construction having been completed but a short time and, and now that everything is in working order it is miterpased that a carload of matte will find its way to the public smelters of this city at regular intervals of every two or three days.

The Glasgow & Western is one of the

which any mining section in the west may well feel proud.

Richness of the Stateline Mining District Becoming Known.

(Special Correspondence.)
Provo, Peb. U.—Attorney D. D. Hounz
has returned from a short visit to the has returned from a short visit to the Stateline minims district, and is very enthissiastic over the showing of the prospects in that section. Very little known, in general, of this camp, and many have formed adverse opinions of it, while ignorant of its richness, Grainally, however, it is becoming known, and prospectors and mining experts are taking a greater interest in it. All who go there say the camp has the richest surface showing of any in the state. In speaking of the camp, Mr. Hours said:

"It is one of the best camps in the

In speaking of the lest camps in the state. Of course, there is not the bustle and noise of a large camp; that has yet to come. But the experienced eye can readily see that all the essential qualities are there. I was surprised on looking over the ground, to see how rich the ere is. It carries untold wealth in gold and silver, not in places or streaks here and there, but all over. He surface showing is unequaled by any other camps in the sairs. There may be richer camps, perhaps there are buf for its immense body of ore, wealth beyond the countless millions of Sentine Clark or Old Crossus himself, and that right in sight. Stateline is unright in night, Stateline is un-

that right in sight, Stateline is unequated.

The rock is of a porphyritic formation. Every foot of progress has to be made by blasting. There are many prospects there, and all are being worked. One has to be shipped thirty-five utility set, but soon it is thought the railroad will be right into the came of one-half mile a day.

Therething is in good condition for a rash in the spring. The weather there now is balmy and warm, this winter fidner touch them at all. While I was there I met several mining experts, and overy one was surprised and perfectly wild over the showing. Some property is constantly changing hands, an eastern syndicate just the other day brought a prospect there for 18,000. Take they are many sided view of things, I think the camp will have a boom in the mear future, and it wouldn't surprise me if it stees right into the front ranks with the leading mining camps of this state.

THE NEW EXCHANGE.

Brokers Get Excited and Pile Up a Long List of Stock Transfers.

The new exchange did some tall busi-ess yesterday afternoon and piled up a long list of sales before the close, the prospects and producing mines doing the bulk of the business during the session, among the favorites being Little Pittsburg, which sold on a rising market, while Joe Bowers Extension was stronger than during the morning was stronger than during the morning call of the old exchange, closing strong at 9% cents bid and 9½ asked. Antier being a favorite at figures given below. Joe Bowers was able to hold its own, while all along the line extensive dealings were chronicled, the pit being crowded with brokers while the lobby was packed.

The New Year Group. Hon. Alma Eldredge of Conlyille, was in the city yesterday, is inter-ested in the new copper find in Weber

Substitutes

There are none for Schilling's Best tea. There is none other fresh-roasted.

the New Year group, as previously stated in these columns.

In speaking of this ground, which is strong copper-bearing, Mr. Eldredge states that the drift being driven in on the vein is now well under cover, the face showing a 46-inch vein of ore, some of which carries excellent values in the red metal, and as copper quotations are on the upprade, and the indications are that large budies of copper will be opened with more extensive development, the owners of the New Year are feeling already as if in the near future they might be able to pose as bonanta kings.

Mr. Eldredge states that the ledge has been traced from the mountainside down to the base of the full in the canyon, and that new and permanent workings will be starried at this coint, which is only about 600 yards frem the

which is only about 600 yards from the

BIG COPPER STRIKE.

Great Quantities of Rich Ore Found East of Orangeville.

(Special Correspondence.) Orangeville, Feb. 15.—Excitement i Orangeville, Feb. 15.—Excitement is high over the great strikes in mining claims east of here that are just being found. L. E. Le Sieur of Provo and others have been out prospecting, and it appears that they found some copper proposition that assays high in copper and gold, and those who have been in the vicinity where it is found say there are immense quantities of it. There was a regular stampede from Castledale on Monday for the dignings, which are about thirty miles east.

The Joe Bowers Extension.

In speaking yesterday of the cent-a-share assessment levied on the capital stock of the Joe Bowers Extension Mining company, Secretary Frank A.
Druchl stated that it was not because
the treasury of the association was
empty, but that it had been imposed in
order to provide for future contingencies, as more money would be needed in
the near future in order to perfect patent title to the property, and also to
provide for the continued development
of the mine, as Miking pumps would
soon be needed, it being the intention
to go to the deep in opening up this
promising ground as it should be.
Mr. Druchl also stated that pending
the collection of the assessment and the
obtaining of government patents to the
Joe Bowers group, the force employed
in the mine would be temporarily decreased, but that after the pumps had
been installed and the title perfected,
the property would be vigorously operated.
The further statement was made that stock of the Joe Bowers Extension Min-

order to provide for future contingencies, as more money would be needed in the near future in order to perfect patent title to the property, and also to provide for the continued development of the mine, as kinking pumps would soon be needed, it being the intention to go to the deep in opening up this promising ground as it should be.

Mr. Druchi also stated that pending the collection of the assessment and the obtaining of government patents to the Joe Bowers group, the force employed in the mine would be temporarily decreased, but that after the pumps had been installed and the title perfected, the property would be vigorously operated.

The further statement was made that it was the injected of the stockholders in every possible way, no alarm being felt in the least over the threats of litigation against the association.

The New Mammoth.

The officials of the New Mammoth Gold Mining company, operating in the Daiton & Lark country, are feeling in excellent spirits over the fact that in the making of the excavation for the faundations for the mill in course of a parallel vetn or a feeder to the main oxidized over was uncovered a parallel vetn or a feeder to the main a parallel vetn or a feeder to the main a parallel vetn or a feeder to the main a parallel vetn or a feeder to the main a parallel vetn or a feeder to the main a parallel vetn or a feeder to the main a parallel vetn or a feeder to the main a parallel vetn or a feeder to the main a parallel vetn or a feeder to the main a parallel vetn or a feeder to the main a parallel vetn or a feeder to the main a parallel vetn or a feeder to the main a parallel vetn or a feeder to the main a parallel vetn or a feeder to the main a parallel vetn or a feeder to the main and the fail knew whet thousands in all heads and the provided the parallel vetn or a feeder to the main and the parallel vetn or a feeder to the main and the parallel vetn or a feeder to the main and the parallel vetn or a feeder to the main and the parallel vetn or a feeder to the main and the p

states that this wealth producer and divident payer is looking well.

It is reported that a deal is on looking to the consolidation of the Guiden Scale, near Mercur, with the Annapoles ground adjoining, the impression prevailing that the combination is a good one.

It is learned that good headway is being made in the development of the Ingot, adjoining the Mercur mine, and that the three of the drift being driven north from the old shaft is in mineralized ground, adjoining the Mercur mine, and that the face of the drift being driven north from the old shaft is in mineralized ground, adjoining some gold.

The Raymond Mining company of Euroka, now engaged in the development of promising ground north of and adjoining the Gonnia-Keystone mine, has just let a contract for the snatung of its double-compartment shaft to the 68-foot level.

Major J. E. Jackson, president of the Salt Lake sinck exchange, made the announcement yesterday that hereafter there would be no Saturday afternoon call of the exchange, the new ruling to go into effect today.

Will Griffithe has returned from his Tintle viet, While in this progressive

to into effect today.

Will Geririthe has returned from his
limits visit. While in this progressive
flattict he made at impection of tim
property of the Crown Polit Mining com-sult, and the states that the bottom of the sixty-foot shaft being sink in its de-velopment shows a good-signed ledge, which is heavily improgramed with lead altronates and galona, the indications oning of a most fixorable nature.

Amount the shipment in the market ver-

carbonaics and gaions, the indications being of a most favorable neture.

Among the shippers in the market year-levels were be Unice Sam wite five carbonds of good ore, the Grand Cuntral with sixteen cars, the South Swansa with four cars, besides which the Redwing of Bingham had a forty-five-ton consignment of the besides which the Redwing of Bingham had a forty-five-ton consignment of fine ore on the market, and it is learned that within a week or ten days the company will report with another shipsnent of good copper, as well as affiver-lead ores.

During the call of the new beard yesterday, compaint/was made that a member of the old exchange was interfering with the transactions on the floor, and he berefully will have cause to remember for a long time. To the credit of the old board be it said that but one or two of the smanners have the size, of good manners to such a degree as to attempt to-do business in the pit of the new exchange.

The officials of the Valley When Mining

the making of the excavation for the guilty of offensess made criminal by the foundations for the mill in course of evection near the milline, a six-foot vein at a parallel vein or a feeder to the main ledge, which is mammoth in its proportions, being a fissure in granite.

The row dwelling house, containing ferven rooms, has just been finished, and other mine buildings are in course of construction, besides which the lower mill tunnel is being pushed rapidly into the hill in order to connect with the ore bodies blocked out by the workings from the incline shaft.

As soon as the season fairly opens and the snow disappears, active work will begin in the excetion of the 150-ton mill, the machinery for which has atrendy been ordered.

The Courser Mountain

AN UNBIDDEN GUEST.

Angel of Death at the Home Market faith in the outcome of the mines and prospects of this promising copper camp, writes that in the development of the property of the Copper Mountain Copper company of this city, the 155-foot shaft has disclosed a fifteen-foot body of ore which will carry average values of 15 per cent copper to the tan across its entire width. The company will continue its shaft down to water level, which, according to surveys will be renched at 139 feet.

The showing is also most encouraging in the property of the Beaver Lake Copper company, and the cross-cut bing criven from the bottom of the shaft to connect with the body of ore disclosed on its dip by the shaft while it was being sunk, will soon reach its objective point.

A. J. McMaileh, the manager of the company, will leave within a day of two in order to be present when the contract is completed.

Silver and Lead.

The local metal market yesterday was governed by the following quotations:
Bar silver, 5%; cents.
Lead, brokers, 4120.
Copper, casting, 16½ cents.

Wheat Lost On Early Advance and

Wheat Lost On Early Advance and Clused Lower.

Chicago Feb. II.—There was considerable steadines in wheat during the first half hour's trading. Early Liverpool and New York quotations showed a market advance, while there was a good deat of nerrousness among local tradens, growing out of the sudden death of President Faurs of France and the contingency which might follow. May opened us higher at Magazine, and na there was a disposition to even up there was a good business transacted at the top flears. The new and conditions, however, fluidy because of the sudden and withdrew their appear. Liverpool feat part of its early advance and indications at stock bally gentless in connection with a considerable weakness developed by cont, the wheat market began to lose ground. May was formed down to 21s, cleaning at 17s bayers. Heavy receipts with an absence of shipping demand and accumilating stocks, for which there were no bayers outside of the penalisters, oppressed corn. May closed as lower.
